

Do you know Your PPEs?

Remember, for PPE to be effective, it must:

- be used at all times when handling infectious materials or when there is a risk of exposure
 - be worn and used correctly, as the item was designed to be used
 - be properly fitted – ill-fitting PPE can increase the risk of contamination and exposure
 - not be reused if the item is disposable and meant for a single-use – discard after use
- Lab Coat (RMM 309)
 - Hand Protection (RMM 321)
 - Eye Protection (RMM 310)
 - Respiratory Protection (RMM 311)
 - Foot protection (RMM 312) *including RMMs 320 & 600*
